## Continuation Sheet (PTOL-303)

Continuation of 2. NOTE: Applicants proposed amendment removing the length of the region which must have a certain percent identity to SEQ ID NO: 77 (claim 1) and the addition of new percent identity limitations (claims 2 and 3) introduduce new issues afterfinal that would require a new search.

Continuation of 5. does NOT place the application in condition for allowance because: the rejections of record remain based on the nonentry of applicants proposed amendment. Applicants proposed amendment if entered would overcome the 112 2nd rejection of claim 7 as well as 112 1st paragraph rejection based on a lack of written description. While applicants proposed amendment has reduced the scope of the genus of caspase polypeptides claimed and thus would result in helping applicants overcome a rejection based on a lack o enablement, it remains that further consideration must be given to this issue in order to make any decision on whether such a rejection would be withdrawn.
